### PROJECTS

#### Hashtology Decentralized App

[github.com/logann131/hashtology-dapp](https://github.com/logann131/hashtology-dapp)

- Established a user-friendly decentralized application upon the **Ethereum blockchain** that let people transfer crypto currency around the world
- Applied the combination of the modern front-end framework, **React**, and the type-safe programming language, **TypeScript**, to mitigate type-error in runtime and enhance application performance and responsiveness
- Utilized the utility-first low-level CSS framework, **Tailwind CSS**, for rapidly building custom user interface

#### Dev Meet Up

[github.com/logann131/meetup-app](https://github.com/logann131/meetup-app)

- Launched a dynamic social network for developers to meet up using the **MERN stack**
- Incorporated **React-Redux store** for highly scalable application-level state management that allows access to user, profile, post, and authentication states globally
- Utilized **Cloud-Native Database, MongoDB Atlas**, to effectively stores and accesses schema-less users' information
- Implemented an authentication system with cryptography to enhance privacy protection using **jsonwebtoken** npm package

#### Tic Tac Toe

[github.com/logann131/tic-tac-toe-next-ts](https://github.com/logann131/tic-tac-toe-next-ts)

- Built and launched a friendly and interesting tic tac toe game utilizing **NEXT.js**, a lightweight framework built on top of **Node.js** enabling **React** based functionalities such as server-side rendering and generating static websites
- Applied **glassmorphism effect** design style to improve the visibility of the user interface
