### OBJECTIVE

Highly motivated and detail-oriented Junior Front-End Web Developer seeking to leverage technical skills and knowledge to contribute to a growth-oriented company by creating accessible and responsive websites as part of a dedicated, results-driven team.

### WORK EXPERIENCE

#### Full-stack software engineer internship Virginia, United state

Sep. 2022 – Dec. 2022

Jobs4Interns – Domenix

- Migrated codebase from **React class** to **functional components**, improving code maintainability and performance.
- Utilized the **MERN stack** to design and implement **RESTful APIs**, allowing for efficient data transfer between the front-end and back-end.
- Implemented **React-Redux** to manage the application state and improve code scalability and organization.

### EDUCATION

#### Green River College Auburn, WA

Jan. 2017 - May 2019

Associate in Arts in Information Technology

**CGPA: 3.94/4.00**

- Relevant course work: Front-end Web programming, Java OOP, Data Structures, SQL Database

#### State University of New York (SUNY), College at Oswego

Jan. 2021 – exp. May. 2023

Bachelor of Science in Computer Science

**CGPA: 4.00/4.00**

- Relevant Courses: System programming (C), Software Engineering (Java, React, Liberty), Algorithms and Data Structures

### PROJECTS

#### Support Who You Love (SWYL) *(Full stack + Blockchain)*

(Capstone project) – <https://github.com/swyly> - <https://swyl.vercel.app>

- Led the development of the **SWYL** platform as a solo developer, utilizing front-end technologies such as **Next.js**, **TypeScript**, and **React.js** for efficient and user-friendly user experience
- Incorporated **CSS framework TailwindCSS** to design and create a visually appealing and responsive user interface.
- Utilized the **Ethers.js library** to connect the **client-side application** to the **blockchain**, allowing for seamless NFT transactions and donation processes
- Implemented **3 restful-based microservices** for the backend using **Golang** and **MongoDB**, providing a robust and scalable infrastructure for **off-chain data** management and **API services**
- Developed and deployed **5 Solidity smart contracts** on the **Polygon Network**, allowing for **low-cost** and **efficient NFT creation and management**, as well as supporting **club membership** and **donation functionalities**

#### Dev Meet Up *(Full stack)*

(Side project) – <https://github.com/logann131/meetup-app>

- Developed and launched a dynamic **social network platform** for developers using the **MERN stack**
- Implemented **React-Redux store** for efficient application-level **state management** and **global access** to user, profile, post, and authentication states
- Integrated **Cloud-Native Database, MongoDB Atlas**, for efficient storage and retrieval of schema-less user information
- Integrated an advanced **authentication system** utilizing **cryptography** for **enhanced privacy** using **jsonwebtoken** package

### SKILLS

|             |  |
|-------------|--|
| Front-End   | Next.js • React • HTML5 • CSS • Tailwind • Styled Component • Bootstrap • WordPress            |
| Back-End    | Golang • Open Liberty • Spring Boot • NodeJS • Express • MongoDB • MySQL • Rest API • Firebase |
| Blockchain  | Ethereum • Solidity • Hardhat • Waffle • Ethers.js • Truffle                                   |
| Deployment  | AWS • Netlify • Heroku • Docker  |
| Programming | Golang • Java • Python • JavaScript (ES6) • TypeScript • C • C++ • SQL • Dart • PHP            |
